Trustee.

Dr. F. D. TYERMAN,  
Trustee.

## FOREWORD

In this first year book published by the Prince Albert Collegiate Institute, it is appropriate to refer to the work and life of the institution. This will tend to a fuller realization of the benefit to be derived by those in attendance and to the consideration of ways in which improvements can be made and higher levels reached.

The objects in view in conducting any educational institution are at least threefold—to develop the intellect, to strengthen and train the body and to awaken and foster ideals of right living and of service.

Whether wisely or not, intellectual development has usually received the largest place in schools. To an increasing degree, however, it is now being realized that the other phases of educational effort are deserving of greater attention than they have in the past received. It is recognized that every student should acquire a certain fund of information about the world in which he lives, about the activities of men and women, about the history of the race. Such knowledge helps one to appreciate the nature of life and its problems. The person who not only has this knowledge but also has learned to apply it to the solution of life's problems, and who has become inspired with the firm will to make the most of life for himself and others,—he has the secret of achieving power.

It is vital that one should also form the habit of study and the habit of work. One should leave school with the fixed purpose of remaining always a student. Our graduates bring to the solution of the difficult problems of life better judgment, clearer powers of discrimination between right and wrong and between real worth and mere sham, than those who have not had their educational opportunities.

"Always a student" should represent the spirit and purpose of every graduate. The study at school of a few of the masterpieces of literature should be but an introduction to a great treasure house; the study of great movements in history should but direct attention to the great world changes now transpiring and stimulate interest in helping to guide and control these present-day movements for the general good.

Physical education is also of vital importance, for the highest success cannot be achieved, however complete the intellectual development unless the body is strong. Some pupils make the serious mistake of giving sports too large a share of

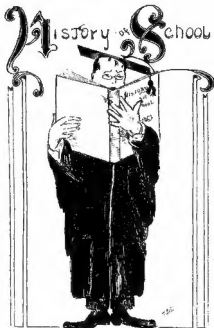

their time; others make the equally serious mistake of giving their whole attention to academic work, to the neglect of physical development. The most successful are those who seek the balanced development afforded by various phases of collegiate activities, intellectual, physical and social.

The moral tone of our school is of the utmost importance. But this is an aspect of development not readily affected by direct effort: rather most improvement come through the influence in the school of teachers and pupils in whose lives are found qualities of heart and mind worthy of emulation. The student body as a whole shows a good attitude and displays many fine ideals. Always, however, there are a few individuals, often of good ability and possessing great possibilities of achievement and of service, who prove disappointing because they fail to realize their own worth and to measure up to their opportunities and responsibilities.

With the issue of the Year Book another year passes from us with all its successes and achievements, and with whatever failures have been allowed to find a place. Presently a new year will begin and again the call will come to seize every opportunity for improvement, for progress and for service. According to the old Latin proverb, "Opportunity has hair in front, behind she is bald; if you seize her by the forelock, you may hold her, but, if suffered to escape, not Jupiter himself can catch her again." Will not all seize to the full the opportunities of the new year?

G. A. BROWN.

"There is a tide in the affairs of men,  
Which, taken at the flood, leads on to Fortune;  
Omitted, all the voyage of their life  
Is bound in shallows and in miseries:  
And we must take the current when it serves,  
Or lose our ventures."—Shakespeare.

There were originally two school districts in Prince Albert, Central and East End. In the Central school a certain amount of continuation work was done. In 1907, while P. E. Graham, B.A., was Principal of Central School, a new high school district was organized, the first trustees being, D. W. Adam, Chairman; Hon. T. H. McGuire, L.L.D., Rev. Colin G. Young, B.A., and A. H. Woodman. Mr. Graham was appointed to the principalship of the new High School and A. Kennedy, M.A., was assistant.

The new High School was first held in the old Presbyterian church at the corner of Avenue D and Eleventh St. West. The school attendance kept increasing and soon a larger staff was necessary.

Plans were now under way for the construction of a suitable High School building. A splendid site was chosen on Twentieth Street West. Looking north, one has a wonderful view of the city itself, the grand old Saskatchewan River and the wooded hills in the distance. In December, 1909, the present building was ready for occupation. It contains seven large class rooms, gymnasium, auditorium, library, offices and two laboratories, well supplied with the equipment necessary for teaching all branches of experimental science included in the High School Course of Studies. Ample provision is also made for individual experimental work carried on by the pupils, an essential factor in modern science teaching.

F. H. Perkins, Ph.B., was appointed to the staff in Sept., 1910, and in Dec. of the same year J. A. Snell, M.A., became Principal of the High School and Superintendent of the Public Schools. He was instrumental in having the two original public school districts amalgamated. After two years Mr. Snell left to become Principal of the Normal School in Saskatoon. He was succeeded in turn by G. E. Ellis, B.A., J. J. Stapleton, M.A., and G. A. Brown, B.A., the present Principal.

In September, 1913, the Household Science department was established with Miss E. H. Sillars in charge. She was succeeded the following year by Miss C. R. Bredin. This proved a very popular course with the girls of the school and it was with regret that the department had to be closed for two years owing to the

stress of war conditions. Last fall Miss E. R. Gourg, B.A. was appointed to the staff as head of the re-opened department.

The continued growth of the school justified the opening of a Manual Training department in the fall of 1914 under W. R. Fenton B.S. This course too had to be discontinued during the war years. Mr. Fenton was sure to resume charge when it was reorganized last fall.

There has been an ever increasing and widespread demand that our schools provide a practical business training. To meet this very real need, a Commercial Course was introduced in September 1919. Miss E. R. Cragg Commercial Specialist being appointed to take charge of the department. A first year enrolment of thirty-four is satisfactory proof that this department is justifying its existence.

It is interesting to glance at the steady increase in the numbers of those in attendance at High School. When the high school district was first organized in 1907 there were 71 pupils in Grade VIII and the High School classes and a teaching staff of two. By the time the school was moved to the new building the teaching staff was composed of four members with 88 pupils in attendance. By June, 1912 the attendance was past the 100 mark. By Jan. 1914 there were 130 pupils and the fall term opened with 148 and a staff of 10. During the year 1918-1919 the school was crowded. There were eight classes, two of which were Grade VII, the total enrolment being as high as 240. With prospects of increased attendance in the fall it was deemed advisable to transfer Grade VIII to the Public Schools.

Thus the building which was planned to accommodate the city's High School population for some time to come, is already in use to capacity. More class room space will soon be imperative as the auditorium and gymnasium are increasingly inadequate to the growing needs of the school.

## OUR MARCH ACROSS THE RHINE.

"Daily Orders. Part II. Nov 13, 1918

Battalion will parade at 6:40 a.m. in full marching order and move to Harou.

This order was issued at Semain France and was the occasion of the beginning of our march across Belgium into Germany and across the Rhine at Cologne.

Of course the main item of interest to us was the "full marching order" which consisted of one pack and equipment one rifle and bayonet one entrenching tool and handle one mess tin one gas mask one helmet one greatcoat sixty rounds of ammunition and various other such small items. At any rate by dint of early rising a hurried breakfast and a hasty shave we managed to collect our one pack and equipment one rifle and bayonet, etc. and we fell in at the appointed hour. After the usual preliminary, we started our "fifty minute march and ten minute rest" which we maintained till we reached Heron. Our first day was finished.

The next day we marched through Villenotenweg, crossed the Franco-Belgian border at Blane Musson and went on to a little village Stuhr where we passed the night. We continued our march next morning to Wasmuel where we had a two days' rest. Here we were only five miles from Meuse and two miles from the place where the British first met the Germans in 1914. In 1914 the Germans had entered the town and shot sixty-seven men women and children. Quite a number of civilians told me the same thing and I saw the ransacked houses. Also they lined ten of the leading men of the city against the church and shot them.

We left Wasmuel about 4 A.M. and marched to Sotignies where I found a splendid bullet in a Belgian home. We stayed here two days and then marched to Neville where we were given a wild reception by the people.

From Neville we marched to Genappe which was very interesting as we passed close to the Plains of Waterloo. It was in Genappe that Napoleon's carriage was captured after the battle.

From Genappe we had a three days' march. One day we marched twenty-three miles and the next day we didn't have any rest. Eventually we reached Andenne on the banks of the river Meuse a very pretty place with one of the old Ardennes men thus hanging behind it. As in Wasmuel here also about fifty people were lined up and shot in 1914.

It was on Dec. 1st that we left Andenne and for five days we had steady marching through the old Ardennes ranges to L'auzeaux which was three kilometres from Luxemburg and ten kilometres from the German frontier. We stayed here for a day. Next morning we resumed our march and about one o'clock in the afternoon our battalion hard standing on the Belgian side played us across the border.

I must say that although our packs felt heavier than when we started there at I was a certain satisfaction in knowing we were at last on German soil.

From the border we had four days' heavy marching through the little white-washed villages, such as we had seen all the way

for a Andenue but then we came to a prettier and more progressive looking country around Euskirchen. Euskirchen itself is a city of rather old style but has a magnificent barracks, which is splendidly equipped.

From here on the country was very pretty clean and prosperous looking. The little villages were kept very clean. We marched to Brühl where the Kaiser had a summer residence.

We left Brühl early one morning and the same afternoon entered Cologne. It seemed too good to be true. Cologne is a beautiful city with clean wide streets and some very splendid buildings, the most prominent of which is the cathedral. This latter is the most imposing structure of Gothic architecture in the world. It was started in 1248 and finished in 1880 at a cost of \$10,000,000. The city is connected with Dantz on the opposite side of the river by three bridges, the largest of which is the Hohenzollernbrücke a stone structure of immense size.

That first evening in Cologne we were very busy in a general 'clean up'—polishing our brass and 'blousing' our equipment in preparation for the big event of the march across the Rhine. The next morning we fed on it fixed bayonets, and marched through the city and over the Newbrücke across the Rhine. Generals Plumer and Currie were on the opposite side to receive the salute and to inspect us. We were billeted in the people's houses on the outskirts of the city. Here we had a much needed two-weeks' rest.

The German civilians in general much to our surprise, seemed quite friendly and treated us very well. No doubt some symptoms of their friendliness were due to policy, but in other cases the people did so many wanted for things that the billet was more as a home amongst friends rather than a billet of troops in an army of occupation in a conquered enemy country. Personally I had a very good billet. The people were really friendly and treated us quite hospitably. We spent Christmas Day there and between what the people could get and what we could furnish from our canteens and the canteens, we had a jolly family Christmas feast.

On December 27th we went by train in the usual box cars, to Lindlar where we suitably celebrated New Year's by a Battalion dance. The next day we went out on outpost duty at Lathar on the 90 Km. ring around the Cologne Bridge head. Here we had to make the civilians show passports and identification cards before we allowed them to enter the occupied territory.

On January 7th we left Lindlar and were sent to Huy, Belgium, where we stayed until the latter part of March. Then we returned to England en route for Canada.

DEAN O. CATH

## LITERARY SOCIETY EXECUTIVE

Back Row: Wendell Howard, William Nelson, Webster Louis, Eric  
 Bremer, Curt John, Mansford, Jr., Nelson, Philip, West  
 Middle Row: Eagle, Miriam, Hubert de la Courciere, Fred, Jack,

 Sinclair, Robert, Paul  
 Front Row: Shirley McKay, Constance Sparks, Eleanor Knox, Doris V.  
 Sparks, Phyllis Biggs

## LITERARY SOCIETY.

THIS SOCIETY, old and renowned in the annals of the school owes its inception to the interest and activity of Mr. Snell, then Principal, now Dr. Snell, High School Inspector for Saskatchewan. On Oct. 10th, 1910, he called a meeting of the pupils and the society was launched, under the Presidency of David Presvigne, who was ably supported by Kate MacDougall, Vice Pres., Anna Meredith, Secretary and Alice Davis, Treasurer. This Society selected the school colors of red, orange and black so gallantly borne by our pupils, and our motto, "Conspici Virescimus."

At the reorganization of the Society in 1912 a definite constitution was drawn up, which stated that the aim was "to promote the interests and welfare of the pupils of the High School. Later our school paper, "Collegiate Vibrations," made

is a sight how to our school world. Let us hope the ensuing year will see its revival.

Year by year the Society has increased its sphere of usefulness and activity under competent directors. For the current year these are Hon. Pres., Mr. Perkins, Hon. Vice-Pres., Mr. Hughes, Pres. W. Logan 1st Vice-Pres., P. West 2nd Vice-Pres. R. Paul Sec., C. Musk, Treas., 1st term, J. Nelson, 2nd term, J. Sinclair.

As this Society has a worthy aim, the all-round development of the pupil along intellectual, oratorical, musical and social lines, it naturally occupies an exalted position in our life. What latent genius it often brings to light! Many legal, literary and religious lights in Saskatchewan's future will look back to the old 2<sup>d</sup> A. C. I., where, with fear and trembling, they delivered their maiden speeches. Truly "gelidus tremor excurret per ossa."

But no "icy tremor" permeated Clifford Elliott's breast when in his brilliant oration "The Dream of the Ages" at the oratorical contest he captured the medal so generously offered by Mr. H. Lacroix. Then like Alexander looking for new worlds to conquer he hied forth to Moose Jaw as representative of Northern Saskatchewan. Though this time Victory capricious jade—did not rest on his banners, yet we know he fought a "good fight."

#### Public Speaking

Our Society has never been wanting in power of musical expression. Not of us can it be said, "We have no music in our souls." We have a five-piece male orchestra which rendered many enjoyable numbers throughout the year. Though the piano seems the favorite instrument especially with the girls—the

sweet strains of the violin often resound, and year by year, music is holding a greater interest and playing a greater part, in the school life of both boys and girls.

Let no one think our life is entirely devoted to the pursuits of intellectual pleasures. Firmly believing in the adage 'All work and no play makes Jack a dull boy' we have had several social events throughout the year. In December a merry crowd assembled for a sleighing party. The bells jingled, the night was perfect and the laughter contagious. After the drive we had a most sociable hour in the Collegiate, where refreshments tasted most satisfying to the sharpened appetites, and games and songs abounded.

On one of the perfect moonlight nights we had a glorious time sliding down our famous hill. All proved themselves good sports, and the party was voted the "best ever." These social affairs helped the pupils to become better acquainted, and it is carried out the Society's ideal.

Along the line of dramatics we are the weakest, though scenes from 'Julius Caesar,' 'Crawford,' 'Lady of the Lake' and stunts requiring ludicrous ability were produced this year. But a great field of possibilities lies open for future enterprise and let us just let spectators know that next year a P. A. C. I. play may grace the "Empress" boards!

SENIOR FORM, 1919-20.

Back: Terence Agnew, Waseel Sarachuk, Jack Blackhair, Eileen McElgown,  
 Floyd Wood, Harold Creed.  
 Front: Mary W. La., Frances La., Catherine Sparks, Emma Phillips,  
 Hazel Breedon, Ed. Mitchell, Miss Steeves, R.A.

## SENIOR FORM BIOGRAPHIES

### TERENCE AGNEW

Terence John Agnew, commonly known to his school fellows as "Ya Ya," was born in Prince Albert. He entered the Collegiate in the fall of 1915. With exception of one year spent in the Medicine Hat Collegiate, he has received all his education in Prince Albert.

Agnew is noted as to be for his qualities of leadership, being recognized captain in all sports as well as being an active leader in the social life of the school.

To the farm land his summers are lent,  
 Though in Pharmacy his life will be spent.

### HAZEL BREEDON

Hazel Breedon joined the ranks of the Senior Form of '20 last fall and at once proved that she was going to be an active

not merely an associate member of her class. She is always willing to do her part in a thorough way to make things go—be it in oratory, literary society or athletics. She is an eager student in spite of the high cost of making out of these days. Do you know the saying about one who has an infinite capacity for taking pains? Well, 'that's Hazel all over'."

### **HAROLD CREED**

Harold Creed is just our more example of Saskatoon looking out to our Fair City of the North. He entered our Collegiate very late in the term to complete work for his Senior Certificate. He is a diligent student and also an enthusiastic athlete having a splendid record in Saskatoon Collegiate Sports. His presence will make our Field Day contests more interesting. In his few months in our school he has become deservedly popular.

### **EDWARD ELGIN MILLIGAN**

Edward Elgin Milligan. In Midland, Ontario, he first saw the light, but Prince Albert nurtured his early genius. In 1916 Elgie entered the Collegiate and its life has largely helped to produce "the smile that won't come off." Elgin has taken quite an active part in school affairs, and has made the P. A. C. I. famous by twice winning honors at the departmental examinations. Since "Look before you leap" is his favorite motto, he has not yet decided which profession he will honor. One summer he decided that imparting ideas to the young was his forte, another that telling a lawyer how to win a case was more honorable. Whatever he has ultimate choice we prophesy a useful, honorable career.

### **ETHEL MITCHELL**

When Ethel drifted in from Acadia, home of Evangeline, she brought with her the beauty and smiles of that sunny land.

In her studies she is particularly good in English composition once winning the medal in the Victory Loan Essay competition. An all-round student and a popular classmate is Ethel, but of course good things are always done up in small parcels.

### **LOUISA ORTON**

Louisa Grace Orton came last year to the P. A. C. I. with a record which promised much for the future. She is an industrious student and her standing justifies her hard work. She is very fond of science the marvels and complexities of chemistry being her special delight. We should be surprised if some time

in the future we heard that Louisa had become a second Madame Curie in the field of chemical research. She also enjoys nature study, and her favourite pastimes are gardening and reading.

### ERMA PHILLIPS

"Life goes a-maying with nature, hope and poetry, for she is young."

Throughout her school career she has proven an industrious, keen student, once gaining honors at the Departmental Examinations. She is always generous with her talent for music and art. As a debater and orator she feels no terror of a large audience, and she takes a keen interest in sports, such as basket ball, tennis and hockey. We expect to hear from you in the future, Erma, as a journalist.

### WASSYL SARCHUK

Entered the Collegiate in the Fall of 1917 to complete his Third Class work. He has always passed his examinations in spite of prolonged vacations spent as a real soldier of the soil. Science and mathematics are his strong points and he would excel even more in these subjects if history and Latin did not use up so much of his "pep". Wassyl is a good student and a all-round sport. He is planning to start an engineering course at the University next year. We expect much of this ambitious 'New-Canadian.'

### JOHN SINCLAIR

John Elmer Sarchuk was born in good old Prince Albert. Little is known of his childhood days but we presume they were crammed full of mirth and mischief. He has never admitted it, but we are sure his motto is "Laugh and grow fat" for does he not laugh at any and all times, and a he not "Fat" to old friends and cronies? In the fall of 1916 Jack embarked upon his Collegiate career and soon showed he was a person of weight in all matters pertaining to Junior boys.

Since then he has made steady progress, not only in his studies, but also in popularity both in the Athletic and Literary associations of the school. Jack holds office as Treasurer of the Literary Society, first vice-president of the Athletic Association, and also he faithfully served as Secretary Treasurer and utility player for the Collegiate Hockey team during the past season.

He aspires to be a lawyer.

### MISS CONSTANCE SPARKS

Connie leads in basketball, hockey and tennis. She has held the senior girls' championship for sports for two successive years,

To mention all her varied interests and the different offices which she has been called upon to fill, would not explain what is really Connie. She has that rare quality of inspiring in the rest of us a sense of responsibility and loyalty to our Alma Mater. Not only does she believe in women's rights, but she in herself is a shining example of what women may do. She was President of the Red Cross and—

If you want to skip sewing  
Sital quietly about,  
For Connie will get you  
If you don't watch out.

### MARY WILSON

Our little Mary is a child wonder, having entered upon her high school career at the tender age of eleven years. She is a paragon of industry no lure being stronger than the call for homework, even in study periods. Mary intends to attend the Saskatchewan University where she will take up languages having already made a good start in Latin, French and English. Her ambition is to pound Latin and other disagreeable subjects into the heads of future scholars. In all her spare time she reads and reads and reads. Success to you, Mary.

### FLOYD WOOD

Byron Floyd Wood was born in Haliburton, Ont. Early in life he took Horace Greeley's advice and arrived in Prince Albert. Here he set about to obtain his education and has risen to be one of the sage fathers of the P. A. C. I. Floyd has played a prominent part in all school activities. An evidence of his versatility is that he successfully taught school during a summer vacation. Altogether he may be said to be a worthy member of the senior form, for his absence is always noticed.

### PROPHECY

For I dapt into the future, far as human eye could see,  
Saw the Vision of the world, and all the wonder that would be  
Tennyson in "Locksley Hall"

The Prince Albert Daily Herald of July 9, 1945, gives prominence to the following report:

Last night a delightful function took place at the new Empress Hotel when the 1920 class of the Central Collegiate Institute held a reunion in celebration of the 25th anniversary of their graduation from that august institution. The happy event

was due to the initiative of Dr Louise Orton of this City. The Doctor observed that nine of her twelve fellow graduates would be in the province in July, so she contrived, in spite of her heavy practice, to find time to induce the other members to be present.

The menu included roast of musk ox and sirloin of caribou, tribute levied from the great herds of Hon. John Sinclair, M.A., M.L.A. It was fortunate for Saskatchewan that Mr Sinclair when at the University chose the double course of Agriculture and Forestry. During the last twenty years, as Minister of Agriculture and of Crown Lands, he has reforested Saskatchewan, so that the prairie winds have ceased to be a menace to the soil, and seasons of drought are decreasing. He was the first to act on the long talked of suggestion that the musk ox and the caribou should be domesticated and to make this policy fruitful he has induced the government to extend the railroad from Big River far into the so-called Barren Lands, the home of the caribou. As a result all the land south of the 'barren lands' is either reforested or under cultivation, the fish industry has doubled its output, and the newly discovered mines have reached a most satisfactory stage of development.

Readers will remember that the Province secured control of her crown lands through the unflagging efforts of Elgin Milligan, K.C. who when at the University specialized on constitutional law.

The 27th Chautauqua, now running here made possible at the reunion the presence of Miss Emma Phillips, Prince Albert's distinguished pupil of international fame. The managers of the Chautauqua congratulate themselves that they were able to secure her services, which were keenly sought by a rival company for a tour of the Western States.

A quarter of a century ago the Hudson Bay route to England seemed a vague dream, but Prince Albert has flourished since the combined efforts of Elgin Milligan, K.C., and John Sinclair M.L.A., brought the Hudson Bay line to our City. Since then travellers and trade have in a steady stream contributed to the growing prosperity of this metropolis of the north. On 'The Hudson' the first Hudson Bay steamer of the season, from an extended lecture tour of the British Isles, came Miss Hazel Hreeden our great social reformer. She arrived in the City yesterday in good time and was met at the train by her former classmates.

Miss Ethel Mitchell the authoress, has just returned by aeroplane from the far north where she has been completing a book on the victory of modern science in making life in the cold north attractive and popular. Her book is bound to accelerate the tide of immigration northward.

The years have dealt kindly with Miss Constance Sparks, who seems as capable of winning athletic championships as in the old days. She specialized on physical culture when at the University and fifteen years ago was made director of physical culture for the province. Through her efforts every city now has an expert superintendent of playgrounds so that our youth have wholesome play and exhibit their characteristic vigour. Through her efforts summer resorts have greatly multiplied among our beautiful lakes in the North and the annual regatta at Lac La Poudre is famous throughout Canada. It is no wonder that the champion carman of the world is of Saskatchewan.

Miss Mary Wilson, Ph.D. Professor of History in our provincial University has in her researches shown the people of Canada the unique importance of education. No phenomenon has been her success that there is a steady accretion of interest in education so that the teacher far from becoming extinct is now the most honored and highly paid servant of the community. That the young now seek learning as men used to seek gold, that they realize that wisdom is the principal thing, is in no small measure due to Dr. Wilson.

The success and brilliant achievements of Floyd Wood, C.E., are so plain as to make that recapitulation seems superfluous. Everyone remembers the change effected in our town when Mr. Wood, immediately after graduation, revived the confidence of capitalists in the La Crosse Falls project. The services of the great civil engineers, Wasyl Sarchuk and Harold Creed, were secured and without a hitch the falls were at last successfully harnessed. The million horsepower developed runs our factories, our street cars, our water works affords us cheap electric light and gives cheap power to the surrounding districts within a radius of 100 miles. Floyd organized the great aeroplane manufacturing company of D. H. Wood and Son, and secured the long idle buildings of the Great West in which to install their great plant. The success of the company has been conspicuous and Floyd is the youngest millionaire in the West. Prince Albert made aeroplanes ply the aerial main in all directions carrying passengers, express and mail bringing hither Yukon's gold and California's fruit. The excellent forest patrol established by the Hon. John Sinclair was made possible by these machines. It was an aeroplane of the Wood 1944 model that brought yesterday in ten hours from Washington, D.C. Terence Agnew, Ph.D., LL.D., the Canadian ambassador to the United States.

THIRD YEAR CLASSES 1919-20

### THE GOVERNOR-GENERAL'S MEDAL

As each Commencement Day returns rare interest centres in and vigorous applause attends, the fortunate recipient of the Governor-General's medal. This is a bronze medal graciously donated annually by His Excellency the Governor-General to the student who has won a degree and scholarship from Saskatchewan University who has the following being taken into consideration: (a) Regularity of attendance, (b) conduct and deportment, (c) excellence in sports and athletics, (d) qualities for leadership, (e) attitude to work, (f) general progress in class. In 1913 the medal was first given, and won by Mary Paul, Grade VIII, now the happy possessor of a degree and scholarship from Saskatchewan University who has thus proved that her subsequent career has fulfilled its fair promise.

No presentations were made in '14 and '15, but in '16 the medal was granted under the same conditions with except on that the words "to the pupil of the Middle and Senior Form deemed, etc." were added. It was won by Nellie MacLeod who will next year complete her course at Sask. University and who in '19 won the medal for the highest standing in her class.

Rex Pattuck, accountant in P. Burns won it in '17, Ivan Taylor, an undergraduate in Sask. University in '18 and Irene Frith in '19.

We confidently expect that these later winners will uphold the traditions of the earlier ones, and we know that Sask. will benefit by their enterprise.

We confidently expect that these later winners will uphold the traditions of the earlier ones, and we know that Sask. will benefit by their enterprise.

Ever since the inauguration of the University of Saskatchewan it has given a scholarship of the value of thirty dollars per year, good for the tuition fees of the four year course at the University. This is awarded on the nomination of the Collegiate staff, to the pupil who has obtained the best standing at the junior or senior matriculation examination.

Since the winner must display rare qualities of scholarship and an intellect above the average, it has been a much coveted distinction. The first winner in '12 was Miss Marion Dendy, who successfully completed her course at the University, winning the coveted degree.

In '13 Miss Winifred Murray (now B.A.) was successful. In '14 it was awarded to Elmore Frith who refused it, so that it went by reversion to Jean Moore, another graduate. Iona Lawless won the scholarship in '15. Miss Olga Nodeland refused it in '16, and it went by reversion to Mary Paul. Nellie McLeod in '17, Anne Rattray in '18 and Wm. McLeod in '19, are the other proud possessors of this distinction. We know that these are only the forerunners of a long line who will add further lustre to their school. "Sic iter ad astra."

# ATHLETICS

E.L.C.

### ATHLETICS

In the P. A. C. I. physical education occupies a prominent place on the curriculum.

Each year an athletic society is organized from among the members of the student body, and this society with the hearty co-operation of the staff, has full charge of all the sports and athletics in connection with the school.

The officers of the athletic society for the present year are

Hon. Pres.—Mr. Hughes.

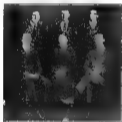

Hon. Vice-Pres. Miss Steeves.

Pres.—T. Agnew.

1st Vice-Pres.—J. Sinclair.

2nd Vice-Pres.—E. Carr.

Secretary-Treas. E. Milligan.

#### ATHLETIC EXECUTIVE

Back—Jack Sinclair, Ernest Carr,  
Elio Milligan.  
Front—Terence Agnew, Miss Steeves,  
Mr. Hughes.

### BASEBALL

During the Spring and Summer of 1919 baseball occupied the premier position in sports at the Collegiate. A league was formed in the school with four teams entered the Pats, Giants, A-B-Stars and Canucks. Many interesting games were played, the Canucks finally winning the league.

Owing to the fact that the City League was not formed until late in the season the Collegiate did not enter their team. However several games were played with the Blue Jays, a city

teams and with teams of outside towns. The team came through the year with the record of having lost but one game.

Their first game was played on Good Friday against the Blue Jays, the Collegiate losing by a 10-4 score. Two weeks later they again met and the game ended in an 8-2 tie. The team then visited Royal winning by a 7-4 score. Towards the end of May the team journeyed to Davis and was again successful in a 7-5 game. Their next game was played at Birch Hills, resulting in a win for the Collegiate by a 7-6 score, in what was probably the hardest game of the season.

The final game was played with the Blue Jays, the Collegiate staging a come-back taking the long end of a 17-7 score.

With such a record to uphold, the boys at the Collegiate are eagerly looking forward to the coming baseball season. This year their intention is to enter the City League, and a successful season is expected.

## RUGBY

This grand old game of games has at last appeared in full force at P. A. C. I., and judging by the enthusiasm with which it was received, it has come to stay. If there is any game that should receive favour here it is rugby. For it instills in all its players that true form of sportsmanship which some of the others do not.

In our opening league, there were four teams entered. When you consider a mix up of fourteen players to a team this is no mean turn out. The scheduled games for this league were

interrupted by early snow so that the winner of the pennant was yet to be decided by another season's rough-and-tumble on the Grid.

Much credit for the season's success is due to Mr. Hughes who coached and managed the teams in a very creditable manner.

A TOUGH *Grid*

## HOCKEY

I

During 1919-20 hockey passed through a most successful season, in fact probably one of the most brilliant in Collegiate Hockey.

A team was entered in the P & A City League, consisting of four teams. The race for first place soon narrowed down to the Shamrocks and the Collegiate. On March 5th these two teams met to decide which should be the Champions of Prince Albert. A keenly contested game ended in a 3-3 tie. Owing to a dispute over the time, which had a great bearing on the result of the game as a goal was scored by the Shamrocks during the time that was under dispute, the tie was not played off. Another playoff was necessary and two weeks later the teams met again. In the first period the Collegiate succeeded in scoring two goals, holding their opponents scoreless. The second period was also in the Collegiate's favor, they scoring three goals against the Shamrocks' one. The third period opened with the Collegiate determined to hold their lead, while the Shamrocks were equally

City League 1919-20

determined to even up. For ten minutes play swung back and forth, then the Shamrocks broke through and scored three in close succession. With but three minutes to go the Collegiate played desperately and succeeded in keeping the Shamrocks from scoring, till the final bell rang. Thus the Collegiate won the Championship of Prince Albert and are holders of the Burns Cup emblematic of the city Championship for one year.

Two games were played with outside teams, one with the Saskatoon Varsity, the Collegiate losing by a 9-4 score. The other was played with Humboldt, ending in a 7-6 score in favor of the Collegiate. The team was especially elated over this win as the Humboldt team had previously defeated a packed team representing Prince Albert.

Although the Collegiate team was lighter than any they met during the season they made up in speed, tenacity and unselfish combination.

Hockey, however, was not confined to the boys. The girls raised two teams and although the first in many years at the school, they showed that they knew how to play the game. Their main difficulty was to obtain opponents. However they managed to secure two or three games with the Powder Puffs, another ladies team in the city, and good exhibitions of hockey were put up.

With hockey such a popular sport in the Collegiate it bids fair for a most successful season in the coming year.

Standing—Wendell Howard Jack Sinclair Mr. Hughes, Geo. Sinclair  
Hector Agnew, Floyd Wood.

Sitting—Ernest Carr Horace Russell Terence Agnew

### TENNIS

The increasing favour with which tennis is being received in the P. A. C. I. is evident by the number of courts that appear on the campus. The number was increased to three last season two of which have been cleared of sod, making as firm and scored a

playing surface as will be found on any of the numerous courts of the city.

Last season a membership of about seventy-five was secured for the Tennis Club. During this period tournaments were arranged among the members, and the games were played with so much enthusiasm that it holds fair for an even larger enrolment in the club for the coming season.

This fascinating game receives as much support from the boys as it does from the girls and the idea among the male members of the Collegiate that tennis is a ladies' game is rapidly fading into oblivion.

## BASKET BALL

Basket ball is one of the leading games played at P. A. C. I. Unfortunately owing to the lack of a proper gymnasium the game is played only during the summer months and is restricted to girls.

Every year there is a team from each form. These teams play through an elimination series, the final game coming on field day. Last year the competition was especially keen, the honours, with the right to hold the shield for a year, finally going to form C. (second year) with form B. (third year), as runners up.

Besides these local games the school team plays exhibition games with outside clubs. Last year games were played with Birch Hills and St. Alban's College. At Birch Hills the Collegiate girls won by a fair margin, but in the return contest the Birch

Hills defence was unbeatable and the visitors carried off the honours after a close game.

Two games were played with St. Alban's College each team winning one. A third game was arranged but owing to rainy weather and pressure from approaching examinations it was never played.

In these games the school was represented by the following players:

C. Sparks, C. Wright, I. Frith, A. Kelly, J. McKay, Eva Porter, Edna Porter, B. Knox, M. Tait, D. Sparks, F. Eagle, G. Avery.

The present season promises to be a most successful one. Pass up the Collegiate almost any afternoon between four and five and you will see an enthusiastic group of girls enjoying themselves on the Basket Ball courts.

Florrie Eagle, Bessie Knox  
Sitting—Dorothy Sparks, Vera  
Wright, Edith Loucks

## FIELD DAY

The annual Field Day was held on May 10th. With perfect weather and an unusually large number of well-trained contestants the field day of 1919 was easily the most successful in the history of the school.

The Boys' Senior Championship was won by Lloyd Good with Wendell Howard a close second. Not satisfied with a mere win, Lloyd succeeded in breaking two records, viz. throwing the Base Ball and the Senior Shot Put.

The other championships were won by the following: Boys' Junior—Webster Logan. Webster broke almost every junior record. The list is too long to enumerate. Next year he will be a senior and he promises to make them all take notice.

Girls' Senior—Constance Sparks.

Girls' Junior—Florence Eagle.

Interform Championship—Form D (second year).

COLLEGIATE CADET CORPS.

### CADET CORPS

Each year the Cadet work of the Collegiate is becoming more and more prominent. During the past year the Corps had a total enrollment of 56 members and at the annual inspection on June 14, was ranked second among the senior corps' of the province.

Throughout the winter months target shooting is carried on each week. In addition to prizes offered by local authorities, the Danar on Cartridge Co. offers Bronze, Silver and Gold pins to Cadets sending in ten targets with scores of fifty or better for bronze, fifty eight or better for silver, and sixty five or better for gold pins. These prizes have done a great deal to add interest to the work.

The following cadets have won pins: George Sinclair (Bronze and Silver), John Horne (Bronze and Silver), Gordon Harris (Bronze and Silver), Raymond Frith (Bronze and Silver), Preston Miller (Bronze), Alex McKinnon (Bronze), Wm Broadshaw (Bronze), Wm Goodfellow (Bronze), Roger Graham (Bronze), Rex Brooks (Bronze) and Harold Creed (Bronze and Silver).

### THAT LITTLE GAME CALLED SCHOOL.

(An exciting game for the winter months)

This game can be played by any number of people and is so interesting that parents generally insist upon their children taking part in it.

The game opens with the leader called the teacher asking the other players known as pupils questions, of which they seldom know the answers. For every correct answer given the pupil counts one and for each unanswered the teacher counts one.

Another interesting phase of the game is known as Homework which each pupil is supposed to do, of course, it is never done but any who may be able to bluff the teacher that they have it done count one, if they are unsuccessful in this bluff the teacher counts one and the pupil pays the game an hour longer than the others after four o'clock. A little excitement may be added to the game by the pupils chewing gum or passing notes. If they are not caught in either of these pastimes they count one but if they are, the teacher counts one. Any pupil who can

WAITING FOR A RECOMMENDATION

SLIGHTLY RATTLED!

$$x^2 + y^2 = \text{COURTESY} + \frac{H50}{2} \text{ ad DOMINUS...!!!}$$

pass Algebra off for Latin counts two, but this is seldom accomplished, if caught at it the pupil is suspended from the game by the teacher until such a time as they reach a satisfactory agreement, and the teacher counts two.

To see which pupil has been most successful in preventing the teacher from obtaining points all the pupils are required to write what are known as exams, which consist of questions of whose answers they are ignorant but which they are supposed to know. This is usually near the end of the game. The pupil who can answer the questions in such a way that he obtains enough marks to pass, wins the game thus fooling the teacher.

Every pupil who passes counts six and causes the teacher to lose four. Interest is added to the game by allowing honours to every pupil who can answer the questions in such a way that he obtains exactly the least possible number of marks necessary to pass. This feat is attempted by very many of the players and is very often accomplished. Every pupil who obtains a pass is advanced into another stage of the game while those who have striven for honours but in their eagerness not to overstep the mark have fallen slightly beneath it stay in the same stage for another year.

June 20

but—

ARE WE DOWNHEARTED ??? NO!!

### STUDENTS WHO HAVE BECOME LEADERS

We are pleased to note that some of our students are coming into prominence as officers in their respective classes in the University of Saskatchewan.

Mabel Freeman who graduated from Senior Form in 1916 will have the honour of wielding the Senior Stick for girls in

1920-21 The same honour among the boys accrues to Harold Freeman who left us from the Middle Form to become a banker, later completing his course and becoming a member of Class 21.

John Taylor an excellent, good fellow who completed the Senior Matriculation, joined the Varsity Class of 21 and has been made President of the Y. M. C. A.

Willard Agnew who passed his Jr. Matriculation there and saw active service in France has been made Secretary of the Students' Council.

Clara Smith has been elected Vice-President of the Historical Society.

Mary Paul who graduated this year is President of the Prince Albert Varsity Club.

Ruth Carr, (B.A., Sask. 19) has held a fellowship in English at the University of Toronto during the past year. She returns to her Alma Mater in September having been appointed to a lectureship on the staff of the University of Saskatchewan.

PRINCE ALBERT VARSITY CLUB UNIVERSITY OF  
SASKATCHEWAN

Miss Mary Paul B.A. President Mr Willard Agnew Sec Miss Nellie McLeod Mr Wm Blakeney Miss Nellie Freeman

### BACK FROM THE WAR

Among our students of the present year are several who have been overseas and seen active service in France. Philip West Form B Artist Jones, the 46th Battalion left for overseas in 18 and was sent to France in the following year. He was gassed at Lens and after recovery again went into action. He was wounded at Passchendaele. Upon receiving his discharge after the war was ended, he came to the college. We hope to see Philip pass his matriculation and complete his course for a civil engineer.

Joseph Nelson joined the 243rd Battalion in 17 and went to England the same year. He was wounded in action at Mars not yet recovered and on his return to camp he took up the work of Junior Matron in order with the view of studying dentistry. We all hope Joe will succeed in his undertaking.

Robert Paul joined the 243rd Battalion and crossed the channel in 17 but because of his youthful loss he did not get to France till the following year. He was in action at Arras, Cambrai and on the Rhine. He earned without a scratch and will in future we trust cure all ills with pills.

### HONOUR ROLL KILLED IN ACTION

Carr, (Sask Un.) C. Finney (Sask Un.) E. A. Howse (Sask Un.) Wm. J. McLeod (Sask Un.) Grant Smith, (Sask Un.), Clifford Davis, (Sask Un.) MacLean Wallace (Sask Un.) Joe Nelson (Sask Un.)

### SCHOOL—AS IT SHOULD BE.

(Concerning B. & C. pupils.)

They are algebraic wonders, all their leisure time they spend,  
Solving problems in equations, that are at their fingers' end  
In their higher mathematics, they will gain a college fame,  
While their geometrogenitus will add lustre to their name.  
They are up in all the r subjects, and figure on their fortes  
And they even know the age of Pericles according to reports.  
They have read the leading authors and their diction is most  
choice.

They can rattle reams from Browning in a cultivated voice.  
Never platitude they utter, they're original and bright,  
And they seem to use expressions, that are commonplace and  
trite.

They are versed in many languages from Dutch to Corsican  
They can quote a dozen poets, in the tongue of quaint Japan.  
They excel in French and Spanish, and it even has been said  
They know all the rules of grammar, of a language long since  
dead.

Agents  
for  
Gossard  
Corsets

# MORGAN'S

1001-1003 BROADWAY, NEW YORK CITY

Specialists  
in  
Women's  
Garments

## WE ARE INTERESTED IN THE STYLE OF CORSET YOU SHOULD WEAR

Are you amongst the women who by a corset just the same as you would a spoon—just ask for a size? If you are, We specially invite you to call and let our corsetiers fit you with a GOSSARD CORSET. You will be surprised at the comfort. Prices from \$3.75 \$5.00 up.

### If You are of Average Figure

If you are a matron of average figure, with all the possibilities of youthfulness important on the "Older" side you will appreciate the Gossard corset that has given your problem especial care. Remember, your figure tells your age.

### If You are of Slender Figure

If you are of slender figure do not think because of your slenderness your corset does not matter. Your charm is your poise attained with a correct corset when fitted by an experienced corsetier will be a comfort and pleasure to wear.

### If You are of Full Proportions

If you are of full proportions do not think you have to resort to cumbersome corset contrivances that restrict your freedom of movement and give you that appearance of being over-corseted that is so fatal to your attractiveness.

# CHIROPRACTIC

Is the study and application of a universal philosophy of biology, theology, theosophy, health, disease, death, the science of the cause of disease and art of permitting the restoration of the triune relationships between all attributes necessary to normal composite forms, to pauculous quantities and qualities by placing in juxtaposition the abnormal concrete positions of definite mechanical portions with each other by hand thus correcting all subluxations of the articulations of the spinal column, for the purpose of permitting recreation of all normal cyclic currents through the nerves that were formerly not permitted to be transmitted, through impingement but have now assumed their normal size and capacity for conduction as they emanate through intervertebral foramina the expression of which were formerly excessive or partially lacking—named disease.

There are a number of Chiropractic schools in the United States, including The Palmer School at Davenport, Iowa.

## THE FIRST INVESTMENT A YOUNG MAN SHOULD MAKE

is an Endowment Policy because by taking it when he is young he secures his Policy at a lower rate. His Policy matures and he receives his money earlier in life. He acquires the habit of saving systematically.

"If you want to know if you are destined to be a success or not, you can find out—the test is simple and infallible. Are you able to save money? If not, drop out; you will lose, and the seed of success is not in you."—James J. Hill.

The Confederation Life, which has enjoyed for many years the confidence and esteem of the insuring public, is prepared to issue a Policy on your life which will **MAKE YOU SAVE MONEY**. Special rates for ages 11 to 19. Full particulars mailed to you, give your age nearest Birthday.
